The screenshot shows a web browser window displaying the rendered HTML table. The table has three rows and three columns. The first row contains text in the first column. The second row has a colspan of 2 in the first column. The third row has a rowspan of 2 in the first column. The rendered table is as follows:

ini baris pertama kolom kedua	tambah 1 kolom	
ini baris pertama kolom pertama	ini juga tambah 1 kolom lagi	
ini juga tambah 1 kolom lagi	ini sekarang menjadi gabungan 2 kolom	

29.

The screenshot shows the Visual Studio Code interface with the file 'buatTabel.html' open. The code is identical to the one in the previous screenshot, but the first column of the third row now has a colspan of 2 instead of a rowspan of 2. The code is as follows:
